

# Interventional Genetics Scholar Program

**Help build the future of individualized genetic medicine!**

## OVERVIEW

The Interventional Genetics Scholar Program puts early-career scientists and clinicians into leadership roles inside the **N=1 Collaborative**: the global network working to make individualized therapies scalable. Join our team across our six leadership roles: **Annual Meeting Chair, Scientific Advisory Board Co-Chair, Seminars & Content Chair, Community Engagement Chair, Education & Communication Chair, or Industry Engagement Chair.**

## ELIGIBILITY

- Current undergraduate/graduate student, postdoc, or clinical trainee
- Experience with or interest in individualized medicine
- Highly motivated trainee with strong organizational and interpersonal skills
- Ability to commit **~5 hours/week** over a **two year** term
- Supervisor approval

## SCHOLARS GAIN

- Hands-on leadership experience running a live N1C program
- Direct mentorship from leaders in the field
- Visibility across the interventional-genetics community
- Lifetime membership in a global network of N1C alumni
- Funded travel + registration to N1C Annual Meeting

## APPLICATION PROCESS

### Phase 1 (Due: November 2, 2026)

Submit CV, short essay, supervisor approval

### Phase 2

Practical follow-up assignment with formal Zoom interview

**Apply by 11/2 and learn more about IGSP roles on our website!**
